

Hasim Zafer Cicek

Software Engineer | Backend & Full-Stack

Ankara, Turkey | hasimzafer.cicek@gmail.com | linkedin.com/in/hasim-zafer-cicek | github.com/hasimzc | +90 541 442 2858

Technical Skills

Languages: Python, Java, C++, JavaScript, TypeScript, SQL
Backend: Django, Flask, REST APIs, gRPC **Frontend:** Vue.js, Jinja, HTML/CSS
Databases: PostgreSQL, MariaDB **Cloud:** Docker, Amazon EC2, Google Compute Engine
Core / Tools: Data Structures & Algorithms, Git, Google Apps Script, Qt, Qwt

Experience

- Backend Engineer** Mar. 2025 – Present
TechNarts Ankara, Turkey
- Own **4 backend modules end-to-end** on a production **Django** platform, translating **100+ feature requests, issue reports, and operational requirements** into maintainable backend changes.
 - Collaborate directly with enterprise customer and internal engineering teams to clarify requirements, investigate production issues, explain service and data behavior, and coordinate fixes through deployment and validation.
 - Develop and integrate backend services using **REST APIs, gRPC, Django/Python**, and **Docker**, resolving cross-service problems and improving production reliability.
 - Built monitoring across **200+ hardware and system paths** with predictive alarms, and designed archival workflows for pipelines processing approximately **10 GB/week**.
- Software Engineer** Jul. 2024 – Present
Part-time Freelance Remote
- Owned end-to-end development and publication of a Google Workspace extension for **Aitopia Chat**, integrating Google Sheets, Docs, and other Workspace applications; reached **36,000+ users** with a **4.5 average rating**.
 - Delivered a custom **Python** e-commerce analysis solution processing **5,000+ product listings**, translating marketplace data into decision-ready insights for marketing and product-placement use cases.
- Software Engineer Intern** Aug. 2023 – Sep. 2023
TUBITAK Gebze, Turkey
- Developed GUI, spectrogram, and binary-matrix visualization components for a Submarine Warfare Management System using **C++, Qt**, and **Qwt**, turning complex system outputs into usable engineering views.
- Front-End Engineer Intern** Jun. 2023 – Aug. 2023
Turboard Ankara, Turkey
- Resolved **12 critical application issues** and developed functionality using **Vue.js, TypeScript**, and **JavaScript**, improving application reliability and user experience.

Selected Projects

- Stock Trading Automation System**
- Founded and led a **6-member engineering team** building an automated trading platform combining technical analysis and financial sentiment analysis.
 - Architected infrastructure across **Google Compute Engine** and **Amazon EC2**, coordinating data pipelines, backend automation, trading algorithms, and deployment.
- Student E-commerce Platform with Virtual Currency**
- Built a **Python/Flask/PostgreSQL** platform supporting **500+ daily active users** and **2,000+ monthly transactions**, with user management, bidding, virtual-currency workflows, and API testing via **Postman**.

Problem Solving & Leadership

- Problem Setter** Jun. 2023 – Present
Algoleague Remote
- Validated test data for **72 algorithmic problems**, authored **14 original problems**, and wrote editorials for **39 problems**, communicating complex solutions clearly and rigorously.
- HUPROG Senior Team Lead** Jun. 2022 – Jun. 2023
ACM Hacettepe Remote
- Led organization of HUPROG 2023, increasing participation by **10%**; authored **4 competition problems** and **4 homework problems**.
 - Instructed **3 programming and algorithms courses** for ACM Hacettepe, translating technical concepts into clear, structured explanations for students.

Education

Hacettepe University Oct. 2019 – Jun. 2024
B.Sc. in Computer Science Ankara, Turkey
