

Hasim Zafer Cicek

Software Engineer | Backend & Full-Stack

hasimzafer.cicek@gmail.com | linkedin.com/in/hasim-zafer-cicek | github.com/hasimzc | +90 541 442 2858

Technical Skills

Languages: Python, Java, C++, JavaScript, TypeScript, SQL
Backend: Django, Flask, REST APIs, gRPC **Frontend:** Vue.js, Jinja, HTML/CSS
Databases: PostgreSQL, MariaDB **Cloud / Infrastructure:** Docker, Amazon EC2, Google Compute Engine
Core / Tools: OOP, Data Structures & Algorithms, Git, Google Apps Script, Postman, Qt, Qwt

Experience

Backend Engineer Mar. 2025 – Present
TechNarts Ankara, Turkey

- Owned **3 backend modules end-to-end** on a production **Django** platform, handling **100+ feature requests, bug fixes, and production issues** across development, debugging, and long-term maintenance.
- Developed and maintained backend services using **MariaDB, Docker, and gRPC**, with a focus on reliable data handling and production stability.
- Built server-monitoring functionality across **200+ hardware and system paths** and introduced predictive alarms to improve early fault detection and operational visibility.
- Designed data-retention and archival workflows for pipelines processing approximately **10 GB/week**, reducing database growth and improving application responsiveness.

Software Engineer Jul. 2024 – Present
Part-time Freelance Remote

- Owned end-to-end development and publication of a Google Workspace extension for **Aitopia Chat**, integrating Google Sheets, Docs, and other Workspace applications; reached **36,000+ users** with a **4.5 average rating**.
- Built a custom **Python** e-commerce analysis solution processing **5,000+ product listings**, transforming raw marketplace data into actionable insights for marketing and product-placement decisions.

Software Engineer Intern Aug. 2023 – Sep. 2023
TUBITAK Gebze, Turkey

- Developed GUI and data-visualization components for a Submarine Warfare Management System using **C++**, **Qt**, and **Qwt**, working with complex system data in an engineering-focused environment.

Front-End Engineer Intern Jun. 2023 – Aug. 2023
Turboard Ankara, Turkey

- Resolved **12 critical application issues** and developed frontend functionality using **Vue.js, TypeScript, and JavaScript**, improving application reliability and user experience.

Selected Projects

Stock Trading Automation System

- Founded and led a **6-member engineering team** building an automated trading platform combining technical analysis and financial sentiment analysis.
- Architected cloud infrastructure across **Google Compute Engine** and **Amazon EC2**, coordinating trading algorithms, data pipelines, backend automation, and deployment.

Student E-commerce Platform with Virtual Currency

- Built a **Python/Flask/PostgreSQL** platform supporting **500+ daily active users** and **2,000+ monthly transactions**, with user management, bidding, virtual-currency workflows, and API testing via **Postman**.

Competitive Programming & Leadership

Problem Setter Jun. 2023 – Present
Algoleague Remote

- Validated test data for **72 algorithmic problems**, authored **14 original problems**, and wrote editorials for **39 problems**, demonstrating strong data-structures and algorithmic problem-solving skills.

HUPROG Senior Team Lead Jun. 2022 – Jun. 2023
ACM Hacettepe Remote

- Led organization of HUPROG 2023, increasing participation by **10%**; authored **4 competition problems** and **4 homework problems**.

Education

Hacettepe University Oct. 2019 – Jun. 2024
B.Sc. in Computer Science Ankara, Turkey
